BEYOND[®] EZ GEL SYSTEM

Beyond EZ™ Gel System is the fast, easy, and safe way to create gel nails. Traditional gel systems take too long to create; each finger needs to be cured immediately and that means doing it one finger at a time. But with the Beyond EZ™ Gel System, technicians can apply a layer on the five fingers of one hand while the other hand's applied gel nails are being cured. Acrylics use odorous, harmful chemicals; but the revolutionary Beyond EZ™ Gel System has no harmful fumes and no MMA! Customers will love the gloss and the resemblance to healthy, natural nails.

*No odor. No MMA. Adheres well to natural nails.
Pink & White never looked so natural!*

\$150/gel set

includes:
steps: 1, 2, 3, 4 - 1 oz each
Instructional DVD

each step sold separately
step 1 - Gel Base 1 oz- \$40

brush kit- \$20
(2 long hair, 1 short hair)

no odor 
no MMA 

easy... fast... durable... remarkable.

prepare nails:

Works great with the Ultimate Table!

1

STEP 1 - GEL BASE (pink)

Apply Gel Bonder & Primer. Primer must be completely dry before applying gel. Using Beyond EZ Gel System step 1, brush a generous layer on clean nails with long haired brush horizontally. Cure for 2 minutes under UV light, meanwhile, repeat with other hand. Use 2 coats on each hand.

2

STEP 2 - GEL WHITE

Using Beyond EZ Gel System step 2, brush white gel only on tip of nail with long haired brush. Using a firm, short haired brush, holding the brush vertically, wipe the excess gel away to make desired smile line shape. Cure under UV light for 2 minutes, meanwhile, repeat with other hand. This white gel will not chip.

3

STEP 3 - GEL CLEAR

Apply Beyond EZ Gel System Step 3 with a brush over entire nail on both hands. Cure for 2 minutes. Repeat for total of 2 coats on each hand. Clean with alcohol and smooth surface with nail drill using a fine bit. Dust nails off nails.

4

STEP 4 - GEL COAT

Apply a thin layer of Beyond EZ Gel System step 4, making sure to cap free edge over nails. Cure for 2 minutes. Use alcohol to wipe away any gummy residue.
